SKILL

Active Listener

Adaptability Team

Player

Time Management

Goal Oriented

I am an enthusiast and innovative developer who loves to learn new languages and try to make full use out of it. Being a developer is a fun job and I like to make things easier for people using my knowledge and coding. Technological advances are what make me happy and making use of it to innovate the life of others is what gives my life the motive.

Software Skills

- **Web Technology** : HTML5, CSS, JavaScript, Jquery, Angular, PHP
- **Programming Lang.** : C++, Java
- **Database** : SQL and MongoDB
- **Mobile Development** : Android
- **Other Tools** : VM Ware, Star UML, Cisco packet Tracer

Projects

- **Gaming Website:** Created a working website of Riot Games. The website had various pages, a fully functional chatbot and a downloadable games page. I was the sole person to work on the project. I faced various difficulties while chatbot creation but I overcame those in problems using my knowledge.

- **Racing Game:** An 2-D racing car game was created in unity using c# as the language and various other intents for the car, race track and surroundings were built. I worked with a friend on this project.

Webinars

- **Green Marketing (May 2021):** We understood various ways of achieving green marketing by adopting sustainable packaging, changes in production processes and cost reduction strategy.

- **Let's Talk Branding (May 2021):** "Good for society before good for business" this was the first line of the webinar. A brand can increase and decrease its value simultaneously based on the marketing method they prefer and the product they launch.

- **Research in IT (April 2021):** Here, we were informed how and why research is important in IT sector. It helps us to understand the complexities of problem and enhances our designing capabilities.

Committee Events

Volunteered for CyberStrike Event(DOT COM CLUB) hosted in Jai Hind College.

Responsibilities:

- Make sure the PC for various games are working correctly.

- Hospitality and making sure no one cheats in the game.

- To control the crowd so it doesn't turns into a mob.
